Node

Express

GraphQL

SQL

NoSQL

Jenkins

AWS

Software Engineer with a core competency in constructing intuitive front-end interfaces that interact with back-end solutions. Equipped with a Computer Information Systems background and professional experience using modern JavaScript stacks to create web applications for multiple vertical markets including FinTech, health, and publishing.

Experience

Mar 2019 - present

Full Stack Software Engineer
PwC
- Build FinTech web applications for Financial Crimes Unit objectives using React, TypeScript, Apollo, LESS, GraphQL, Node, Express, and ArangoDB.
- Drive features including contribution of common components including visualizations.
- Implement Cypress E2E and unit tests in addition to supporting Jenkins CI/CD pipelines.
- Meet with management to gather requirements, define tasks, scope sprints, and collaborate for production efforts.

Aug 2018 - Sep 2019

Lead Full Stack Developer
MovementX
- Worked directly with a team of doctors of physical therapy to set roadmaps for a HIPAA compliant project.
- Led feature development for a web application platform using JavaScript, Python, Django, PostgreSQL, and SCSS.
- Was responsible for an AWS environment including scaling and S3 bucket utilization.
- Created a Gatsby, React, and GraphQL based blog prototype.

Aug 2018 - Mar 2019

Lead Front End Developer
Stackend Solutions
- Greenfielded projects using React, Redux, JavaScript, SCSS, Flask, Python, and MongoDB to realize ideas for small businesses.
- Led team meetings, assigned tasks, and maintained repositories.

May 2018 - Jul 2018

Front End Developer - Contract
Cobia Systems
- Crafted a React, Redux, JavaScript, and SCSS based front end for an existing digital marketing project previously architected on older technologies.
- Interacted with a PHP based API and MySQL database to retrieve data.

Sep 2017 - May 2018

Web Contractor
Literally Media
- Worked with editorial and development teams to establish a gaming vertical within a 25+ million unique visitors per month portfolio spanning three properties.
- Spearheaded UX, QA, and SEO-oriented objectives to improve user retention.

Aug 2017 - Apr 2013

Executive Editor
Evolve Media, LLC.
- Relied upon for the grand strategy and growth of two high traffic video game websites.
- Used JIRA for project management and Google Analytics for SEO analysis.
- Managed a significant rebrand, redesign and migration to WordPress CMS.

Aug 2012 - Mar 2013

Assistant Database Administrator
Adylan Communications, Inc.
- Managed student, faculty, and test records in a MySQL database for local K-12 districts.
- Performed SQL queries for data summation and tested proprietary software.

Education

Aug 2013 - May 2016

California State University San Marcos, B.S. Computer Information Systems
- Program emphasized theoretical foundations and practical applications of CS.
- Led three team projects that focused on web development and engineering.

Aug 2010 - May 2013

Mt. San Jacinto College, A.S. Computer Information Systems
- Classes included topics in system design, server hardware, networking, and databases.
- Completed a system analysis internship with local IT business Conduit Networks.
